Dr J. Lederberg,
Dept of Genetics,
University of Wisconsin,
Madison,
Wisconsin (USA)

Dear Dr Lederberg,

Returned from the States I feel I have to thank you sincerely for the time you gave me during my visit to Madison. I enjoyed the contact very much and in future I will read your papers with the happy feeling that I met the author and that I know what a kind man he is. Our discussion will be of great advantage for Dr de Haan's work and we certainly will look into the matter of E. coli B/15,347. Though I had a lot of things to attend to on my return and am very busy with other things your suggestion will not be lost.

With many kind regards,

K.C. Winkler
